

Provider Notice

New provider toolkits available on website

Thank you for being a part of the Magellan Complete Care of Arizona (MCC of AZ) provider network.

We've developed provider toolkits with information about certain health topics. Toolkits contain clinical guidance, available tools and resources, trainings and more. Current toolkits include:

- Pregnant and Parenting Women with Opioid Use Disorder (OUD)
- Neonatal Abstinence Syndrome/Neonatal Opioid Withdrawal Syndrome

We will continue to add to our repository as we develop toolkits focused on other issues.

About the toolkits

MCC of AZ developed the toolkits in response to the continuing, growing problems related to opioid use during pregnancy. We understand that our providers are on the frontlines of care and are the key to optimal outcomes for our pregnant and newborn members. The toolkits are based on current evidence-based practices and protocols and are designed to support our providers in that care.

Women with OUD often experience intense guilt, stigma and fear of possible loss of parental rights. However, they are experiencing a disease for which there is treatment. MCC of AZ promotes care and treatment that is comprehensive, tailored to pregnancy, culturally appropriate, trauma-informed and free of stigma.

Our goal is to prevent and reduce complications related to substance use and provide treatment during pregnancy with the clinical goals of minimizing impacts to the neonate, preventing relapse, promoting recovery and strengthening the mother's ability to care for herself and her infant.

To find the Provider Toolkits, visit our website at www.MCCofAZ.com > For Providers > Provider Materials.

Questions?

We're here to help you, so you can focus on your patients. Call our Network Provider Services department at 1-800-424-5891 or email MCCAZProvider@MagellanHealth.com.
